

CONNECT 2 LEARN PROPOSAL

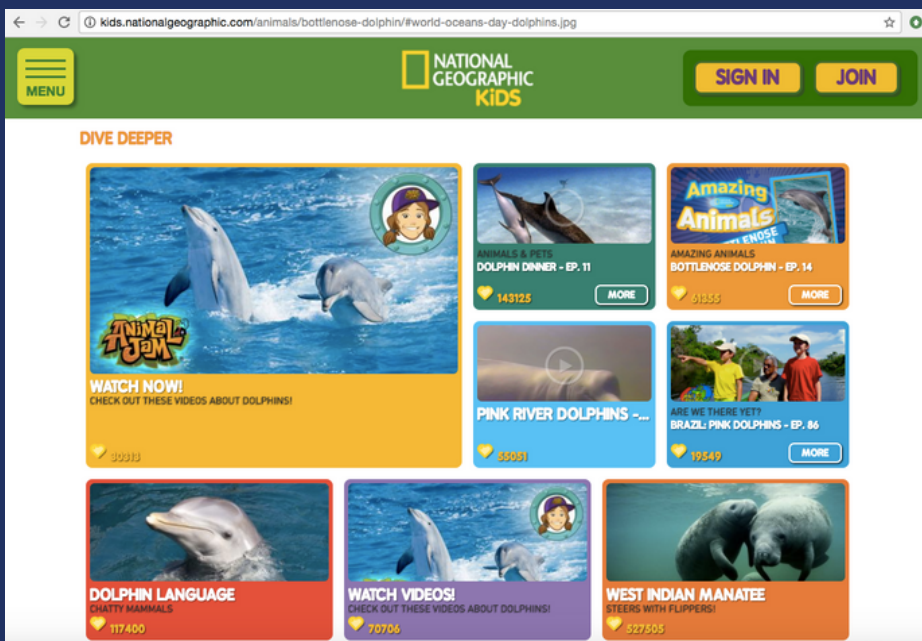

kids.nationalgeographic.com

NATIONAL GEOGRAPHIC KIDS:

- magazine pages on the topic being taught
- website includes multiple interactive ways to learn

WHY INCORPORATE TECHNOLOGY?

- enhance learning
- keeps students engaged
- appeals to multiple sense

WEBSITE INCLUDES:

- videos
- pictures
- texts
- games

ABSTRACT:

Today technology is more prevalent in children's lives so it only makes sense to incorporate it in their school lives as well. Teachers have the capability of enhancing students learning experiences through the use of technology. In this proposal, I will use the Nation Geographic Kids website to study dolphins. Each student will get a copy of the handout provided about dolphins. First read through the National Geographic handout with the students and then go to kids.nationalgeographic.com to build on what the student learned in the reading. As shown in the tutorial, after going to the website, search for "dolphin" and begin to explore. The use of technology allows for students to learn in a more interactive way. This website includes videos, pictures, maps, games, and fun facts about the topic being taught in class.
