

How to Use Geoboard

Drag and drop a band onto the board.

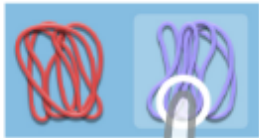

Drag from a line to create a new vertex.

Drag a vertex from one peg to another.

Tip: Double-tap to delete a vertex.

Change the color of a selected shape

Tap a rubber band pile to change a selected band to that color.

Start over

Clear bands on all boards, as well as drawing and text.

Choose a board

Choose square, large rectangle, or circle board.

Show grid

Show grid lines on boards.

Show numbers

Show numbers along x- and y-axes.

Duplicate a selected shape

Duplicate a shape, then move, rotate, or flip it. (Also duplicates text.)

Math Text Tool

Open a keypad for creating expressions and equations.

Tip: Double-tap your text to edit it.

Fill shape

Fill or unfill a selected shape.

Fill all shapes

Fill or unfill all shapes on the board.

Drawing Tools

Open drawing tools and show the drawing layer.

Trash

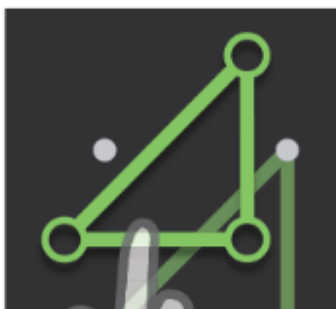

Delete selected items.

Working with a Duplicated Shape

Move the duplicate shape by dragging it.

Drop the shape by tapping off of it. Each of the shape's vertices will attach to the nearest peg.

Reflect the shape either vertically or horizontally by tapping the flip buttons.

Drag the rotate handle to change the angle of a shape.
