

How to Use QR Codes in the Reading Classroom

1. Download the FREE “Scan” app to any Apple or Android device.
2. Use <http://www.qrstuff.com> to create any QR code needed. Simply copy and paste the URL (author’s website or YouTube video). Then download or print the code.
3. To create audio recordings, record yourself reading the book using <http://vocaroo.com>. When finished, the website will create a URL for your recording. Copy and paste the URL to the website used in step two. Then follow the same process.
4. Attach the QR codes to the front of the books or hang up in your reading center.
5. Enjoy!
